SUMMARY

Junior Software Developer with experience in both startup and banking industries. Skilled in building frontend and backend systems, creating APIs, database design and deploying complete solutions to production. Proficient with React, Spring Boot, Node.js, Google Cloud Platform and IBM WebMethods for system integration. Focused on delivering efficient, maintainable solutions that meet user and business needs.

WORK EXPERIENCE

INDICO by Telkomsel   Jakarta, Indonesia (Hybrid)

Full Stack Developer   September 2025 – Present

- Designed and implemented AI integrations for Engage, covering image and content generation and conversational AI agent rules to improve automated engagement experiences.
- Delivered full-stack features for TselPlus, slicing Figma designs into production-ready React components and developing secure backend APIs following enterprise standards.

PT Bank Syariah Indonesia   Jakarta, Indonesia (On-site)

Full Stack Developer   April 2025 – September 2025

- Developed web-based admin dashboard for Sandbox Platform, including LDAP integration, Sandbox monitoring, audit logging, and MinIO-based file storage.
- Revamped web-based Multi Payment System Config, migrating from legacy CodeIgniter PHP to React and Spring Boot. Ensured ease of maintenance and better user experience.
- Developed Middleware API for Face Recognition from New Channel to Dukcapil using WebMethods.
- Performed deployment of API Middleware from dev to QA, SIT, UAT environment using WebMethods, ensuring connectivity and compatibility of requests and responses.

PT Bank Syariah Indonesia   Yogyakarta, Indonesia (On-site)

Software Developer Intern   September 2024 – March 2025

- Developed a web-based Sandbox platform for partner onboarding and Open API testing under the Service Banking Platform department, using React and Spring Boot.
- Designed frontend and backend architecture, including secure communication, authentication flow, and Oracle ERD, ensuring maintainability and integration.
- Sliced Figma designs into responsive React components with Tailwind CSS, implemented automatic token renewal, and improved UX by addressing unhandled negative cases.

EDUCATION

Ahmad Dahlan University   2020 - 2024

Bachelor of Informatics

GPA: 3.88

- Magang dan Studi Independen Bangkit Academy Cloud Computing & Mobile Development
- Mobile Programming Laboratory Assistant

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Golang, PHP

Front end: React, Next.js, Tailwind CSS, Bootstrap

Back end: Node.js, Express, Fiber, Spring Boot, Laravel, IBM WebMethods

Database: PostgreSQL, MySQL, Oracle, Redis, MongoDB, Supabase

DevOps: Linux, Docker, GitHub Actions, NGINX, PM2, GCP, AWS

FEATURED PORTFOLIO

- [Micro Music](#) - REST API for music streaming, built with Golang and microservices architecture.
- [Scrap Tools](#) - CLI tools for scraping YouTube comments for NLP datasets.
- [Forum API](#) - REST API built with Node.js using Clean Architecture. Includes unit tests, integration tests, and CI/CD.
